

5. October 11:15 - 12:15

	Narratives/Observation studies	Interview	Interview/Observation - different analytic methods	Symposium – Meta-synthesis	Symposium – Phenomenology	Recruitment of study participants
11:15-11:30	41. Photo-elicited conversations as a tool for engagement in people with dementia: An observational study. Presenter: Nordgren, Lena	135. Excellent Nursing in Oncology Care. An evolutionary Concept Analysis. Presenter: Stie, Mette	27. Grounded theory – a method used to explore the coordinated individual planning process. Presenter: Jobe, Ingela	188. A meta-aggregative approach to the synthesis of nurses' and physicians' experiences in a health-care context. Presenter: Fegran, Liv	95. Using Phenomenology to Understand Patient Experience: A Conceptual Approach. Presenter: Klinke, Marianne E. and Fernandez, Anthony Vincent	38. Participants and non-participants - factors affecting representativeness and reach in randomized controlled trials evaluating the effectiveness of complex interventions. Presenter: Saarijärvi, Markus
11:30-11:45	144. Experience of family function, family involvement, and self- management in adult patients with type 2 diabetes: A thematic analysis. Presenter: Bennich, Birgitte Bøcher	129. Barriers and possibilities associated with performing an interview-study with frail elderly patients in the emergency department. Presenter: Bjurbo, Charlotte	204. The Use of Research Results for Theory Synthesis: An Underutilized Method in Nursing? Presenter: Halldorsdottir, Sigrid	181. Qualitative evidence for practice: scoping review or meta-synthesis methods? Presenter: Westergren, Thomas		99. Palliative cancer patients' experiences of telehealth in home-based care: Challenges in the recruitment of vulnerable patients. Presenter: Steindal, Simen A.
11:45-12:00	164. Newly graduated nurses' experiences at death and with dying patients in medical units in Denmark – poetically represented. Presenter: Jensen, Carsten	101. Possibilities and limitations of qualitative interviews with people with communication impairments. Presenter: Schaepe, Christiane	23. User Experiences when Introducing Patient Reported Outcome Measures in a Haematologic Outpatient Clinic – An Interpretive Description Study. Presenter: Thestrup Hansen, Stine	276. Effect sizes in qualitative research synthesis: How effect size calculations improve the quality of qualitative research synthesis. Presenter: Ludvigsen, Mette Spliid.		62. Methodological challenges in end-of-life care research with cancer patients and their family caregivers in specialized palliative home-care. Presenter: Petursdottir, Asta
12:00-12:15	160. Illness narratives – how to apply an ethnographic approach in understanding the co-construction of narratives between nurses and patients. Presenter: Schoenau, Mai	67. Be seen as a unique person after suffering a second myocardial infarction-A qualitative study describing patients' needs and personnel's descriptions. Presenter: Strömbäck, Ulrica	55. Two birds with one stone - Undergraduate nurse students as partners in research in clinical nursing. Presenter: Søndergaard, Susanne Friis	189. How does the eMERGe reporting guidance improve the quality of analyses and synthesis reporting when applying Noblit and Hare's meta-ethnography? Presenter: Aagaard, Hanne		52. Students and sleep – A story about how to succeed with data collection, a James Lind Alliance user involvement study. Presenter: Løyland, Borghild
				261. Exploring longitudinal qualitative research method using adapted scoping review method - lessons learnt while conducting research on research. Presenter: Audulv, Aasa
